## Appendix A

## AP BIOLOGY EQUATIONS AND FORMULAS

## Statistical Analysis and Probability

Mean
$\bar{x}=\frac{1}{n} \sum_{i=1}^{n} x_{i}$

## Standard Error of the Mean*

$S E_{\bar{x}}=\frac{S}{\sqrt{n}}$
Standard Deviation*
$S=\sqrt{\frac{\sum\left(x_{i}-\bar{x}\right)^{2}}{n-1}}$
Chi-Square
$\chi^{2}=\sum \frac{(o-e)^{2}}{e}$
Chi-Square Table

| $p$ <br> value | Degrees of Freedom |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| 0.05 | 3.84 | 5.99 | 7.82 | 9.49 | 11.07 | 12.59 | 14.07 | 15.51 |
| 0.01 | 6.64 | 9.21 | 11.34 | 13.28 | 15.09 | 16.81 | 18.48 | 20.09 |

## Laws of Probability

If A and B are mutually exclusive, then:

$$
P(\mathrm{~A} \text { or } \mathrm{B})=P(\mathrm{~A})+P(\mathrm{~B})
$$

If A and B are independent, then:

$$
P(\mathrm{~A} \text { and } \mathrm{B})=P(\mathrm{~A}) \times P(\mathrm{~B})
$$

## Hardy-Weinberg Equations

$p^{2}+2 p q+q^{2}=1 \quad p=$ frequency of the dominant allele in a population
$p+q=1$
$q=$ frequency of the recessive allele in a population
$\bar{x}=$ sample mean
$n=$ size of the sample
$s=$ sample standard deviation (i.e., the sample-based estimate of the standard deviation of the population)
$o=$ observed results
$e=$ expected results
Degrees of freedom are equal to the number of distinct possible outcomes minus one.

## Metric Prefixes

| $\underline{\text { Factor }}$ |  | Prefix |  |
| :--- | :--- | :--- | :--- |
| $10^{9}$ |  | Symbol |  |
| $10^{6}$ |  | mega | G |
| $10^{3}$ |  | kilo | M |
| $10^{-2}$ |  | centi | c |
| $10^{-3}$ | milli | m |  |
| $10^{-6}$ | micro | $\mu$ |  |
| $10^{-9}$ | nano | n |  |
| $10^{-12}$ | pico | p |  |

Mode $=$ value that occurs most frequently in a data set
Median = middle value that separates the greater and lesser halves of a data set
Mean = sum of all data points divided by number of data points
Range $=$ value obtained by subtracting the smallest observation (sample minimum) from the greatest (sample maximum)

[^0]

[^0]:    * For the purposes of the AP Exam, students will not be required to perform calculations using this equation; however, they must understand the underlying concepts and applications.
