Advanced Environmental Geology

Course Number: 109

Mr. Adams E-mail: <u>adams@freeport.k12.pa.us</u> Website: <u>www.adamsfhs.com</u> Remind App Join Code: fhsadva

Course Description

Honors Environmental Geology is a course that refers particularly to geology as it relates directly to human activities. Throughout this course the emphasis of study will be on the physical constraints imposed on human activities by the geologic processes that have shaped and are still shaping our natural environment. Because geology does not exist in a vacuum, this course will introduce related considerations from outside geology to clarify various ramifications of the topics discussed throughout this course. Topics to be covered by this course will include Earth materials and structures, the effects of human population on the environment, environmental hazards such as volcanoes, earthquakes, and floods, energy resources and their exploitation, natural resources, land-use planning and resource law. Each of the above topics will be studied from a global perspective, paying particular attention to their importance in Pennsylvania.

My Expectations of You and Your Performance

I expect strong performance from all of my students. As you work towards completing this course, you will benefit greatly by developing a professional attitude in working with both the course material and your fellow colleagues. Your work should be of high quality, exhibiting pride and confidence in your knowledge and understanding of the material. Writing assignments should be edited and complete. Quantitative problem solving should be systematic and intelligible. The following guidelines will help make you successful in this course and throughout your future endeavors:

Oral and Written Communications

Becoming a savvy communicator is a life-long endeavor. Effective communications require intent, diligence, and hard work. Effective oral and written communications are among the few skills that once developed, will advance your future careers and place you at the forefront of your profession. In this course, your communications will be evaluated on the basis of content, effectiveness, grammar, and organization. References and spelling will also count in all written work that is submitted. As you face the challenge of improving your own communication style and prowess, remember the words of Mark Twain: "Tell them what your gonna tell 'em, tell 'em it, then tell 'em what you told 'em."

Problem Sets and Quantitative Calculations

One of the goals of this course is to communicate the solutions to problems. I have high expectations of you and your problem solving abilities and require neat, methodical submission from you. I must be able to follow your logic and discern your results. Moreover, you should be able to understand the problem and its solution. After all, it is your work! Concern for accuracy, precision, and reasonableness should become your goal as an effective communicator and scientist. Techniques to improve your presentation of various calculations include the following items. Always restate the problem on your answer sheet. Label your givens, unknowns, and the equations that are used. Be explicit in unit conversions and always label the units. Be reasonable with significant digits. Show your work and highlight your answer. Consider sources of error and discuss them when significant. Finally, review all answers for reasonableness. Evaluating reasonableness is a skill that takes time to master but is necessary in the development of experience and insight.

Laboratory Component:

Laboratory investigations are designed to complement the "indoor classroom" portion of the course by providing opportunities to learn about our environment through firsthand observations, to test concepts and principles which have been introduced in this class, to explore specific issued and problems in greater depth, and to gain an awareness of the importance of confounding variables which exist in the real world. These labs will invite students to think critically, to observe environmental systems, to develop and conduct well-designed experiments, to utilize presentations, to think analytically and apply concepts to the solution of environmental problems, to form conclusions and to evaluate their quality and validity, to propose further questions for study and to communicate accurately and meaningfully about observations and conclusions.

Supplies

Required Supplies:

- 1) A notebook dedicated to warm-ups, short essay responses, article reviews
- 2) A loose-leaf notebook with pockets and tabs
 - Tab 1: Notes
 - Tab 2: Activities / Labs
 - Tab 3: Reference Tables
 - Tab 4: Syllabus & Grade Sheet
- 3) Extra paper; two pencils and a black or blue pen
- 4) Colored pencils or markers.

Classroom Rules

General Class Rules are: <u>Be Prepared, Be Polite, Be Honest, and Be Attentive.</u>

Specific Class Rules are:

- <u>Do Not Interrupt</u> If the teacher or another student is speaking to the class, raise your hand to be recognized. Do not break in or make "side" comments to a neighbor. When I raise my hand as a signal to be quiet, stop talking and look at me.
- <u>Stay in Your Seat</u> Do not walk around during class unless directed to do so. Have everything you need ready before class begins.
- <u>Leave the Food at Home</u> Students may not eat or drink in the classroom. Closable containers of water are permitted. Gum will be permitted unless it becomes a problem: dispose of it wrapped properly into a trash can. Do not disrupt your neighbors and/or the class by asking for or offering gum during class.
- <u>Work Only on Environmental Science</u> The class period is reserved for learning about Environmental Science; do not work on other subjects during class time unless you have been given specific permission to do so.
- <u>Nothing Goes Airborne</u> Nothing will go airborne in class at any time. This includes pens, paper, and other students.

Tardies and Late Arrivals

A Student who is not in the classroom at the appropriate time is considered either late or tardy. A student is <u>tardy</u> if he is <u>without a</u> <u>pass</u> after the bell. A student is <u>late</u> if he arrives <u>with a pass</u> after the bell. Tardy and Late students are not to disrupt the class. Late students need quietly set their pass onto the teacher's desk and sit down. There is no penalty for arriving late with a pass. The tardy penalty is explained below:

- First and Second Tardies-- Student receives a warning.
- Third Tardy Written discipline referral is sent to the office for detention to be assigned.
- Fourth (and continued) Tardies Student will forfeit 5 points from their 9-week grade for each additional tardy accumulated. A discipline referral will be sent to the office for every third tardy accumulated.

Absences

In general, regular attendance is necessary to fully benefit from a course. If an absence occurs, students are responsible for seeing me to discuss what assignments were missed and for making up the missed work. Students will be given one day for each day of absence upon return to school to make up the work that has been missed.

Assignments

1. Assignments are due at the beginning of class. Anything turned in after the beginning of the class period will be counted as a late assignment.

2. The following point deductions apply to all late work (non-Negotiable):

- Adequate notice will be given for all homework, and students should do their best to turn in work on time. If any homework, labs, papers or other projects are late they will have a 50% grade reduction.
- Any materials submitted after the test for a unit is given will be counted as a zero!

Restroom/Drinks/Locker

You will be excused to the restroom during the first and last five minutes of class only! In addition, students are not allowed to leave the classroom more than twice during a given week unless it is an emergency. You will not be permitted to go to the restroom, a locker, or the water fountain unless it is an emergency or you have completed all work to my satisfaction during class. Come to class prepared! If a pattern of use is established, you will be asked to sit down! In order to maintain restroom privileges, you must correctly fill out the restroom sign-out sheet at the front of the room and take the classroom hall pass.

Help/Tutoring

Please schedule an appointment with me if you would like any assistance with the material. I am available most days before school, after school, as well as, during my planning period. Please make sure you tell me when you plan on coming in to see me!

Grading Systems

All students' work will be evaluated against an established set of criteria. Homework, classroom participation, quizzes, tests, lab reports, and projects will be graded and contribute to a student's overall grade. Point values will be given to graded assignments such as tests, quizzes, and lab reports on a case-by-case basis. There will be no supplemental extra-credit assignments what-so-ever! There are no retakes of tests or quizzes; each grade is final. The following grading scale will be used on all graded material: *(Note: All grades are final and will not be curved or manipulated in any manner unless specified by the teacher.)*

Note to Parents and Students \rightarrow If a student's fourth nine-week grade should drop below a 50%, their grade will be overwritten to represent the actual grade earned by the student in this course. The student's actual percentage grade will be recorded on their report card.

Tests: Tests will fall on average every 15 class periods (not calendar days) regardless of location/progress in a chapter. All tests are considered cumulative and can include material from previous tests, labs, activities, etc. Knowledge is a continuation of understanding, not a fragmented cluster of random intellectual thought.

Quizzes: These will include regularly scheduled quizzes on the material (10 - 20 pts each) and pop quizzes (15 - 20 pts each).

Homework: We will have regularly assigned homework plus a project each grading period.

Labs: We will be doing as many laboratory experiments as possible. We will supplement this with "virtual" labs done using the internet. Students will be required to understand and agree to certain safety standards before participating in laboratory experiments.

Class Activities: These in-class assignments will include both individual and group work.

Notebooks: Well organized materials are often the key to success. Notebooks will be collected at regular intervals for review by the teacher.

Final Exam: There will be two final exams throughout the year, one at the mid-point of the year and one at the end of the year according to the finals schedule. These exams will include an analysis of underlying themes from the course and the students ability to relate topics discussed to real-world scenarios and settings.

Cheating

It is expected that students will use genuine, sincere, and fair means for the accomplishment of the projects and tests from which evaluations of progress shall be determined. Students found plagiarizing, copying or cheating in any way will receive automatic zeros and have phone calls made to their parents.

Students who are found copying homework will have <u>both sets</u> of homework destroyed and will need to redo that homework independently. This means that if someone asks to "see" your completed homework, you should politely say "No." You may tell them what the assignment is, and offer to consult on specific problems, but do not give your homework to anyone but the teacher.

Discipline

I do not anticipate having behavior problems in a class such as Advanced Environmental Geology. It is my philosophy to extend to you both my respect and my greatest effort as an instructor. I ask only for the same in return, both for myself and for your classmates. Discipline problems will not be tolerated! Student Discipline problems will be solved by the following: student / teacher conference; office referral; teacher / parent phone call and/or conference.

Citizenship Guidelines: I will assign a citizenship grade to students on report cards. The following criteria shall be used in determining a student's citizenship grade for each 9-week grading period:

- 1. Attends class regularly
- 2. Comes to class on time.
- 3. Comes to class with necessary materials.
- 4. Completes homework assignments.
- 5. Meets deadlines.
- 6. Does his/her own work when independent work is required; does not cheat.
- 7. Exercises reasonable care of school property.
- 8. Shows respect for others.
- 9. Does not disrupt class; exercises good conduct.

Student Handbook

The rules and guidelines listed above are adapted from the student handbook. All rules and regulations listed in the student handbook will be strictly enforced in this course. For any items not covered by this syllabus, please refer to the student handbook.

Class Trips and Field Experience Opportunities

Any student participating on in-class trips and field experience opportunities must adhere to the following guidelines:

- 1. Participation in the event requires a "C" average or better to attend the teacher led experience
- 2. Students will adhere to all school policies and discipline expectations throughout the activity
- 3. During extended stay field opportunities, parents and students must agree to all necessary rules and regulations through both the Freeport Area School District and participating facilities. In certain disciplinary situations, parents/guardians may be required to pick up their child at the field experience location and/or facility.
- 4. Students are responsible for all trip and field experience costs relative to their participation in the event.
- 5. Students will frequently be responsible for providing their own lunch or the equivalent cost of their own lunch during in-class trips and field experiences.

Cell Phone / Personal Technology Use

Cell Phone Use Guidelines:

- 1. Cell phones and associated technology have a place in the classroom when used appropriately and serve as a classroom aid, not distraction.
- 2. Cell phones are only to be used as directed by the teacher during instruction and/or laboratory exercises.
- 3. If asked to put your cell phone away, the student will do so politely without incident. If a second warning is necessary, the student will place their cell phone on the teacher's front desk and retrieve it at the end of the period. If a third warning is required, the student will be written up for improper use of a cell phone during class.
- 4. Headphones, AirPods, earphones, EarPods or earbuds of any type are not to be used during class unless permission is given by the teacher on a case by case basis.
- 5. Student use of class outlets for charging of their cell phone is not permitted. Do not ask!

Emphasis 1: Foundations

- 1. The Earth within the Universe
- 2. The Early Earth:
 - a. Nature of the Interior
 - b. The Early Atmosphere and Ocean
 - c. Geology, Past and Present
- 3. Impacts of the Human Population:
 - a. Population and Limited Resources
 - b. Disruption of Natural Systems
 - c. Nature and the Rate of Population Growth and Carrying Capacity
 - d. The Uneven Distribution of People and Resources
- 4. Minerals and Rocks
- 5. Physical Properties of Geologic Materials

Emphasis 2: Surface Processes

- 1. Streams and Flooding:
 - a. The Hydrologic Cycle
 - b. Streams and Their Features
 - c. Flooding
 - d. Consequences of Development in a Floodplain
 - e. Strategies for Reducing Flood Hazards
- 2. Shorelines and Coastal Processes:
 - a. Nature of the Shoreline
 - b. Coastal Erosion and Deposition
 - c. Emergent and Submergent Coastlines
 - d. Difficult Coastal Environments
 - e. Coastal Hazards and Impact
- 3. Mass Movement:
 - a. Factors Influencing Slope Stability
 - b. Types and Consequences of Mass Movements
 - c. Preventative Measures to Slope Instability
- 4. Ice, Wind, and Climate:
 - a. The Nature of Glaciers
 - b. Glacial Erosion and Deposition
 - c. Ice Ages, Ice Sheets, and the Greenhouse Effect
 - d. Wind and an agent of Erosion and Deposition
 - e. Deserts and Desertification

Emphasis 3: Internal Processes

- 1. Plate Tectonics General Principles and History
- 2. Plate Movements and Boundaries
- 3. Plate Tectonic and the Rock Cycle
- 4. Earthquakes:
 - a. Basic Theory

- b. Earthquake Hazards and Reduction of Impact
- c. Earthquake Prediction and Control
- d. Earthquake Awareness and Public Response
- 5. Volcanoes:
 - a. Magma Sources and Types
 - b. Locations and Type of Volcanoes
 - c. Volcanic Hazards and Secondary Effects
 - d. Volcanic Predictions
 - e. Past, Present, and Future Volcanic Hazards

Emphasis 4: Resources

- 1. Water as a Resource:
 - a. Global Water Budget
 - b. Surface Waters
 - c. Groundwater
 - d. Water Quality and Use
 - e. Impacts of Urbanization
 - f. Water Conservation
- 2. Soil as a Resource
 - a. Soil Formation
 - b. Soil Classification and Composition
 - c. Soil Erosion and Strategies for Reducing Erosion
- 3. Mineral Resources
 - a. Types of Mineral and Rock Resources
 - b. U.S. Mineral Consumption
 - c. World Mineral Supply and Demand
 - d. Mineral Options for the Future
 - e. Impact of Mining Activities
- 4. Energy Resources:
 - a. Oil and Natural Gas
 - b. Supply and Demand for Oil and Natural Gas
 - c. Coal Extraction and Utilization
 - d. Alternative Energy Resources
 - e. Environmental Impacts of Energy Resources

Emphasis 5: Land-Use Planning and Engineering Geology

- 1. Benefits of Land-Use Planning
 - a. Conversion of Rural and Urban Land
 - b. Land-Use Options
 - c. Maps in Planning
 - d. Site-Evaluation
- 2. Case Histories both Old and New
- 3. Dams and Their Failures
- 4. Resource Law: Water
- 5. Resource Law: Minerals and Fuels
- 6. Cost-Benefit Analysis
- 7. Pollution and Its Control

Lab Safety Contract

Science is a hands-on laboratory class. Students will be doing many laboratory activities that may require the use of chemicals, laboratory equipment, and other items which, if used incorrectly, can be hazardous. Safety in the science classroom is the number 1 priority for students, teachers, and parents. To ensure a safe science classroom, a list of rules has been developed and provided to you in this student safety contract. These rules must be followed at all times.

GENERAL GUIDELINES

- 1. Conduct yourself in a responsible manner at all times in the laboratory.
- 2. Follow all written and verbal instructions carefully. If you do not understand a direction or part of a procedure, ASK YOUR TEACHER BEFORE PROCEEDING WITH THE ACTIVITY.
- 3. Never work alone in the laboratory. No student may work in the science classroom without the presence of the teacher.
- 4. When first entering a science room, do not touch any equipment, chemicals, or other materials in the laboratory area until you are instructed to do so.
- 5. Perform only those experiments authorized by your teacher. Carefully follow all instructions, both written and oral. Unauthorized experiments are not allowed.
- 6. Do not eat food, drink beverages, or chew gum in the laboratory. Do not use laboratory glassware as containers for food or beverages.
- Be prepared for your work in the laboratory. Read all procedures thoroughly before entering the laboratory. Never fool around in the laboratory. Horseplay, practical jokes, and pranks are dangerous and prohibited.
- 8. Always work in a well-ventilated area.
- 9. Observe good housekeeping practices. Work areas should be kept clean and tidy at all times.
- 10. Be alert and proceed with caution at all times in the laboratory. Notify the teacher immediately of any unsafe conditions you observe.
- 11. Dispose of all chemical waste properly. Never mix chemicals in sink drains. Sinks are to be used only for water. Check with your teacher for disposal of chemicals and solutions.
- 12. Labels and equipment instructions must be read carefully before use. Set up and use the equipment as directed by your teacher.
- 13. Keep hands away from face, eyes, mouth, and body while using chemicals or lab equipment. Wash your hands with soap and water after performing all experiments.
- 14. Experiments must be personally monitored at all times. Do not wander around the room, distract other students, startle other students or interfere with the laboratory experiments of others.
- 15. Know the locations and operating procedures of all safety equipment including: first aid kit(s), and fire extinguisher. Know where the fire alarm and the exits are located.

16. Know what to do if there is a fire drill during a laboratory period; containers must be closed, and any electrical equipment turned off.

CLOTHING

- 17. Any time chemicals, heat, or glassware are used, students will wear safety goggles. NO EXCEPTIONS TO THIS RULE!
- 18. Contact lenses may need to be removed under certain circumstances.
- 19. Dress properly during a laboratory activity. Long hair, dangling jewelry, and loose or baggy clothing are a hazard in the laboratory. Long hair must be tied back, and dangling jewelry and baggy clothing must be secured. Shoes must completely cover the foot. No sandals allowed on lab days.
- 20. On announced days, you may be requested to wear a "junk" shirt in the lab setting to protect valuable clothing.

ACCIDENTS AND INJURIES

- 21. Report any accident (spill, breakage, etc.) or injury (cut, burn, etc.) to the teacher immediately, no matter how trivial it seems. Do not panic.
- 22. If you or your lab partner is hurt, immediately (and loudly) yell out the teacher's name to get the teacher's attention. Do not panic.
- 23. If a chemical should splash in your eye(s) or on your skin, immediately flush with running water for at least 20 minutes. Immediately (and loudly) yell out the teacher's name to get the teacher's attention.

HANDLING CHEMICALS

- 24. All chemicals in the laboratory are to be considered dangerous. Avoid handling chemicals with fingers. Do not taste or smell any chemicals.
- 25. Check the label on all chemical bottles twice before removing any of the contents. Take only as much chemical as you need.
- 26. Never return unused chemicals to their original container.
- 27. Never remove chemicals or other materials from the laboratory area.

HANDLING GLASSWARE AND EQUIPMENT

- 28. Never handle broken glass with your bare hands. Use a brush and dustpan to clean up broken glass. Place broken glass in the designated glass disposal container.
- 29. Examine glassware before each use. Never use chipped, cracked, or dirty glassware.
- 30. If you do not understand how to use a piece of equipment, ASK THE TEACHER FOR HELP!
- 31. Do not immerse hot glassware in cold water. The glassware may shatter.

HEATING SUBSTANCES

32. Do not operate a Bunsen Burner by yourself. Take care that hair, clothing, and hands are a safe distance from the flame at all times. Use of a Bunsen Burner is only allowed in the presence of the teacher.

- 33. Heated glassware remains very hot for a long time. They should be set aside in a designated place to cool and be picked up with caution. Use tongs or heat protective gloves if necessary.
- 34. Never look into a container that is being heated.
- 35. Do not place hot apparatus directly on the laboratory desk. Always use an insulated pad. Allow plenty of time for hot apparatus to cool before touching it.

<u>Syllabus / Lab Safety / Classroom Rules and Considerations</u> <u>Signature Sheet</u>

I verify that I have read and do fully understand the classroom policies and expectations for this class at Freeport Senior High School. Specifically, I understand the policies and expectations regarding the following:

- 1. The course syllabus and objectives
- 2. The course procedures and daily expectations
- 3. The grading and assignment requirements/policies
- 4. The use of cell phones inside of Room 51 (MY DEVICE CAN ONLY BE OUT IF GIVEN PERMISSION, I WILL POLITELY SET MY DEVIDE ON THE FRONT TABLE IF THE DEVICE IS DETERMINED TO BE A DISTRACTION, I WILL BE WRITTEN-UP IF NOT COMPLIANT)
- 5. All students deserve to be treated politely and respectfully as an equal
- 6. Late work will receive a deduction of 50%

In addition,

- I have read and do understand the policies of the Freeport Area School District as printed in the student handbook.
- I have read and do understand the Freeport Area School District attendance policies and understand that my capability in this class will be negatively impacted by lack of attendance and "catching up" is my responsibility.
- I acknowledge and agree with the Freeport Area School District computer use policy and understand that classroom laptops and related equipment are to be treated properly and my conduct during use will adhere to district policy.
